From the Grounds on Up!
Be'ato Coffee Company is Calgary's number one provider of freshly roasted coffees and premium loose teas; ordered on line and delivered right to your door. This home-spun coffee venture was founded in June 2007, with original plans growing into a full-fledged coffee shop. As it turns out, the shop part of the equation has never quite materialized, as the owner is too busy taking delivery orders. Most of Calgary's businesses, restaurants, and individuals with excellent taste were Be'ato's first customers.

The Be'ato Difference
What most people don't know is that the coffee you buy in stores, and even if you order in a restaurant, is commonly made with beans that were roasted months or even up to a year ago. When you buy Be'ato coffee, it is truly "fresh-roasted", roasted within the past two days. What's more, at least half of Be'ato's coffees and teas are all-natural and organically grown. The difference is all in the taste!

Little Known Facts
Coffee and tea - especially those grown organically - have a number of health benefits. For instance, coffee is an antioxidant and a natural antihistamine. It boosts mood and memory, lowers the risk of Alzheimer's disease and Type 2 Diabetes, and relieves headaches. Tea stimulates the immune system and helps fight viruses. It also burns calories and acts as a natural anti-inflammatory. The reason it's been consumed for more than 1,000 years.
